

Business Continuity (DRaaS & BaaS)

Keep your business running

Will Your Disaster Recovery Plan Be Effective?

IT disruptions may be inevitable, but data loss and downtime don't have to be. In the event of a failure, CCSI's Disaster Recovery as a Service (DRaaS) and Back Up as a Service (BaaS) ensures fast recovery of your business critical applications while minimizing the chances of data loss.

Three out of four companies fail to prepare for a disaster. Don't be part of the statistics; be prepared. Utilize CCSI's disaster recovery specialists, who can design, provision, configure, and test an effective plan. Utilize our Business Continuity Tabletop Exercises to evaluate your organization's crisis processes and technical response.

Whether your production environment is on premises, a third-party site, or already in the cloud, CCSI's DRaaS and BaaS implements scalable, flexible, secure recovery without requiring changes to existing IT infrastructure. And since it's hosted in the cloud, our offering is ready to bring you back on line quickly, whenever or wherever a disaster strikes.

Protected Recovery Site

RTO under 15 minutes

Business Continuity Tabletop Exercises
