

# NYS DFS Cybersecurity Assessment

## Financial Services Regulation 23 NYCRR 500

### Are You Prepared for the NYS DFS Regulation?

The New York State Department of Financial Services (NYS DFS) created a first-in-nation regulation that mandates cybersecurity standards to covered entities in New York within the financial services, banking, and insurance industries. As of March 1st, 2017 the NYS DFS 23 NYCRR 500 standard has officially been promulgated and organizations effected by this regulation will need to start adhering to this standard. The regulation aims to protect the information systems, data, and process of how an organization performs cybersecurity.

At CCSI we take a phased approach to the NYS DFS regulation that assists with partnering with our clients to navigate them through the 15 sections of regulation. Each one of these sections includes an understanding of the regulation and cybersecurity. Through this partnership our clients receive the benefits of a trusted advisor in both areas to reach compliance and security together.

Whether a small company looking to get started or a large organization with a cybersecurity program already in place our assessments can be broken down into multiple areas of assistance. Through our assessments we can manage the entire process or be brought in to assist with just one section of the regulation. Our experience as a managed security service provider allows us unique approach to assisting our clients with the NYS DFS regulation.

**Training & Assessments**

**Partial or Full Assistants**

**Cybersecurity Specialists**

### NYS DFS Cybersecurity Assessment Benefits

- vCISO
- Managed SIEM
