

# Proof of Concept Lab

## Drive Business Growth, Performance, and Innovation

### Plan, Design, and Test Transformative Network Enhancements

Your IT needs constantly grow and morph to meet business needs. New applications, updates, technology integrations, infrastructure changes and more can all have a major impact on it. Without the right quality assurance and integration testing, these impacts can lead to downtime and lost revenue. The CCSI Proof of Concept Lab gives you a secure, state-of-the-art proof of concept testing infrastructure and optional access to our Professional Services experts, so you can avoid negative impacts.

When you use CCSI Proof of Concept Lab, you'll discover how to transform your business without putting your production environment at risk. We provide the environment and optional expertise needed to explore how you can better leverage new technologies, as well as test and develop disruptive new solutions to accelerate new opportunities for business growth and success.

The lab gives you access to our secure enterprise network with firewall-protected Internet and Private IP connections. That way you can isolate the environment while you do your testing. Our environment features a scalable and flexible virtual environment with over 30 virtual machines. You can leverage our lab and have access to more than 20 different vendor platforms, and state-of-the-art testing tools.

Secure Testing

Infrastructure Testing & Configuration

AWS, Azure, Google, and Private Cloud

### Proof of Concept Lab Features & Benefits

- Infrastructure deployment & configuration
- Application deployment & configuration
