

Comprehensive Services

Strategic Solutions for Exceptional Results

A Unified Solution to Complex Business Transformation

Contemporary Computer Services Inc (CCSI) assists companies to overcome challenges and identify opportunities to achieve exceptional results. For more than 40 years, CCSI has been a leading provider of technology services and solutions in both the private and public sectors, bringing value and collaboration to companies. Clients turn to CCSI for our comprehensive managed services and expertise. They span the full spectrum of an organization's technology infrastructure. Our team helps clients determine current challenges and opportunities, and we set a path to implement the right solutions needed to achieve the business goals.

BaaS & DRaaS

GSA OGS

IT disruptions may be inevitable, but data loss and downtime don't have to be. In an event of a failure or ransomware attack, CCSI's Back up as a Service (BaaS) and Disaster Recovery as a Service (DRaaS) will ensure fast recovery of your business critical applications.

Compliance Assessment

OGS

CCSI can assist with policy/procedure work, remediation of improvements, and gap assessments to achieve compliance, making the compliance process more streamlined. Some of the CCSI compliance assessments: HIPAA/HITECH, FERPA, PCI DSS, NIST 800, and NYS DFS 23 NYCRR500.

Data Center & Infrastructure

GSA

Building a data center platform that accelerates information technology's ability to respond to business needs. CCSI builds virtualized and highly-scalable IT solutions that are automated, secure, and application-relevant to advance the vision of our clients.

CCSInet (Maintenance Services)

GSA

Rest easy knowing that every infrastructure component your business relies on is covered. CCSInet is a bundled on-site support, repair, or replacement service that offers comprehensive and quality maintenance support with substantial savings vs. manufacturer maintenance costs.

Cost Containment & Governance

OGS

Enterprises are often unaware that they are wasting 30-45 percent of their cloud spend. CCSI Cost Containment as a Service (CCaaS) enables you to break down cloud costs, allocate to business groups across the organization, validate the charges, and then forecast monthly spend.

Managed Email Security

OGS

The defense of your organizations email is a high priority when it comes to protecting your user base and confidential data. CCSI's Managed Email Security solution allows organizations to protect their email from phishing, malware, and sensitive data loss.

Managed Services

Your IT staff should focus on critical business issues rather than day-to-day operations. CCSI's managed services is an addition to your current staff allowing in-house staff to focus on business innovation and allowing CCSI certified engineers to worry about the day to day technology requirements and maintenance.

Penetration Testing

Understanding your weakness before you're attacked is an important step in defending your network and data. During a penetration test we'll simulate authorized attacks against your systems to uncover and identify weaknesses within your organization. We considered this a proactive approach for organizations to deal with the threats.

Migration to the Cloud

CCSI helps companies transform the IT department by implementing customized and holistic cloud solutions. CCSI looks at cloud services from both an IT operations and business process optimization standpoint. The value in the cloud lies in transforming and automating the underlying processes and practices.

Physical Security

Whether you need to mitigate data theft, unauthorized access, or improve productivity, investing in the right Physical Security solution can help save your business thousands. To keep your facility safe and protect your corporate assets, CCSI provides a Unified Physical Security Solution leveraging and integrating with your IP architecture.

Mobility

Providing a wireless network is what encourages worker mobility as well as mobility of thought. But the challenges the wireless network present are daunting. CCSI can help your organization determine how to address Guest and BYOD postures while keeping known devices and users segregated from the rest of population.

Proof of Concept Lab

Plan, design and test transformative technology enhancements with the CCSI Proof of Concept lab. New apps, updates, technology integrations, infrastructure changes and more can all have major impacts. The Proof of Concept Lab gives you a secure, state-of-the-art proof of concept testing infrastructure, and optional access to our Professional Services experts.

NOC and SOC

Your network is your business' lifeblood, so monitoring its health is critical. CCSI can absorb your burden by monitoring and supporting your critical IT infrastructure remotely from our state-of-the-art Network Operations Center (NOC) and Security Operations Center (SOC), 24x7. Your business will enjoy increased efficiency, reduced unplanned maintenance costs, and more effective use of your staff.

Security Assessment

Are you properly protecting your sensitive data and IT assets from cybersecurity risks? Our security assessments focus on identifying risks to your sensitive data. Each assessment is guided towards your unique needs and evaluates the current security controls in place. These include: DDoS Simulation, Ransomware, and Risk assessments

Security Awareness & Phishing Training

Despite all the funds you may have spent on state-of-the-art security software, the bad guys are just one gullible user click away from staging an all-out invasion. Recent surveys show that executives can be some of the biggest culprits clicking on phishing links and opening malicious email attachments. By far the most effective strategy in combating these attacks is security awareness training.

Staffing

Finding reliable resources with the right expertise can be challenging and costly. CCSI understands that projects typically have fluctuating resource needs. Whether the staff requirements are full-time or temporary, CCSI's staffing and placement professionals can help your business achieve lower operating costs.

ThreatProtect

OGS

Organizations large or small can fall victim to a cybersecurity threat. ThreatProtect is CCSI's turnkey and custom cybersecurity solution that features field-tested products and services from proven vendors. Once we have a firm understanding of your environment, CCSI assists with an extensive list of proven products and services to address any gaps.

Visibility as a Service (VaaS)

OGS

Moving to a cloud environment forces many companies to rethink host-centric monitoring, because instances come and go with little advance notice. Gone are the days where virtual machine or physical server life spans were measured in years. CCSI's VaaS is designed from the ground up for the unique demands of cloud-based workloads.

vCISO

The security of your organizations assets is important and having proper guidance and executive leadership in a role to manage this process is vital. With our vCISO service you'll get a seasoned professional with full access to their skills and experience growing cybersecurity programs.

Virtualization

What if you could run multiple operating systems and applications on a single computer without having to purchase new hardware? That's the power of virtualization technology. Our engineers can help your business do more with the hardware you already own. For IT that's easier to implement and more affordable to own, we offer virtualized solutions.

Vulnerability Management (VMaaS)

OGS

Organizations need to properly identify their weaknesses and create a plan to remediate these exposures against future attacks. Those who aren't continually searching for vulnerabilities can be left ill prepared against attackers. CCSI's VMaaS and security operations center (SOC) will assist tailoring a program around your unique environment and create custom scheduled scans to search for vulnerabilities.

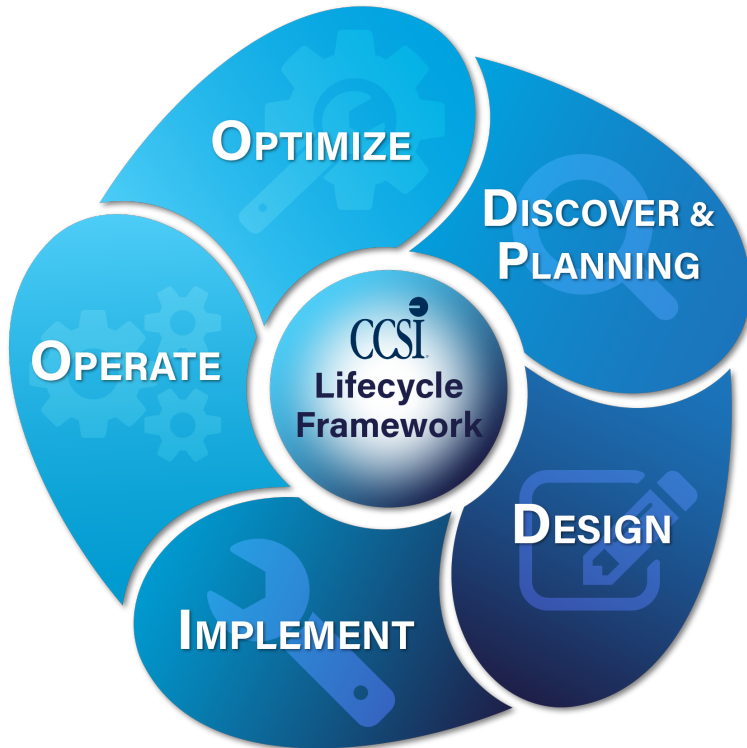

State Contracts

CCSI has state contracts available for the public sector to utilize during the procurement process. New York State Office of General Services (NYS OGS) Information Technology Umbrella Contract, PM68125, and Security Systems and Solutions Contract, PT65383. General Services Administration (GSA) General Purpose Commercial Information Technology Equipment, Software, and Services, GS-35F-178BA.

How Are We Different?

We leverage technology to inspire innovation, promote growth, drive efficiency, and accelerate our clients' success. Our focus is on understanding our clients' unique business challenges and desired outcomes. At CCSI, we think about the entire lifecycle of the technologies employed by our clients and work with them using a holistic approach to help them achieve their goals. We do this by assessing, designing, building, and managing solutions customized for each client's needs to deliver exceptional results.

CCSI is highly certified and has in-depth knowledge of best-in-class OEMs and ISVs, perspective which gives us the flexibility to specify the best technology to drive business initiatives. We provide application-focused solutions, project management, and implementation services led by senior-level delivery consultants. We have the technical expertise as well as the professional and managed services know-how to accelerate each client's success.

We listen, we care, we respond.

Why CCSI?

CCSI provides the highest quality of service in the industry for the full spectrum of technologies—from network infrastructure, containers, managed services, IP security, cybersecurity, SD-WAN, IP telephony, cloud services to storage solutions. Learn more at www.ccsinet.com.
