

# Cost Containment (CCaaS) Long-term Cloud Cost Management

## Do you have Cloud Management and Visibility?

Enterprises are often unaware that they are wasting 30-45 percent of their cloud spend. Because control of cloud accounts is decentralized, many companies are challenged to pinpoint where waste is occurring and how to eliminate it on an ongoing basis.

Companies who start with a focus on managing their cloud cost will often benefit from having a great baseline from which they can define their own unique road map and playbook for implementing cloud governance policies. They can then work to define and implement the cloud governance required to optimize cost, maintain security and compliance, and ensure that the business is able to be more agile.

CCSI Cost Containment as a Service(CCaaS) enables you to break down cloud costs, allocate to business groups across the organization, validate the charges, and then forecast monthly spend. CCSI CCaaS can define cloud operating budgets by business perspectives, notify key stakeholders when they are at risk of exceeding their budgets, and charge back or allocate costs to business groups. CCSI CCaaS, managing your cloud account and budget together.

**Cost Control  
and Savings**

**Manage Cloud  
Accounts**

**Cloud Engineer  
Specialists**

### Cost Containment Service Benefits

- Optimize Available Financial Resources
- Monthly or Quarterly Reports
- Manage Cloud Accounts
- Eliminate Waste

## Why CCSI?

CCSI provides the highest quality of service in the industry for the full spectrum of technologies—from containers to PCs, network infrastructures, managed services, IP telephony, cybersecurity, cloud services, SDWAN, to storage solutions. We provide architecture with innovation. Partner with us and discover what sets us apart from the rest. **We listen, we care, and we support. Let's Grow Together.**
